## Arc Pediment

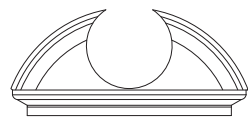

Inspired by the Greeks and Romans. Low pitch and a graduated yet ornate internal step design. The Arch enhances the appeal and the power of the overall aesthetic.

## Arch Pediment

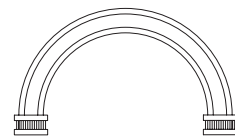

Dating back to Greek, renaissance, and neo-classical architecture, this piece has come into favor in many traditional-styled homes and parlor rooms.

## Bow Pediment

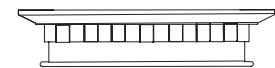

An expressive artistic piece, the Bow Pediment helps empower the design module by breaking apart the continuity into quasi-circle, bringing recognition to every scrupulous detail in your intricate pattern.

## Bridge Pediment

This bold and prominent design has a semi-circular arch that has a rainbow-on-the-horizon type of effect which contrast to the door or window beign accentuated.

## Crosshead Pediment

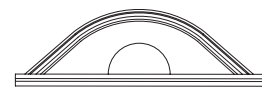

This blocked-styled strong statement is etched with layers to give a very ornate and decorous aura.

## Curve Pediment

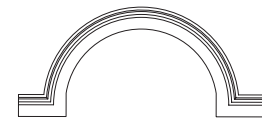

The curve pediment helps to create an ornamental archway to enhance the visceral experience of any window or door structure.

## Dome Pediment

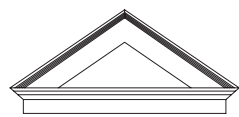

A basic and versatile exterior enhancement to any window or door. Compatible with almost any trimming and design.

## Half Round Pediment

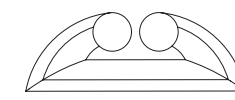

This pediment beautifies any door or window it is paired with. Guaranteed to have no chipping or warping.

## Peak Cap Pediment

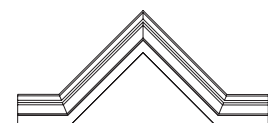

This open ended style is often used in Georgian style architecture. This conventional cutlery in design helps illuminate the room with a simple, classic and understated statement of design.

## Ram Pediment

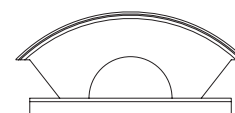

This bold and stylish design consist of thick cuts and contours, perfect for that larger than life look and feel.

## Tri Pediment

The tri pediment is an excellent door or window accent with an immediate and profound impact on your design motif. This design has an open ended bottom with an extra outward flair.

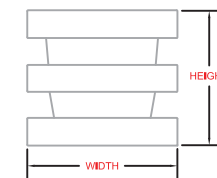

## Vault Pediment

This interrupted arch look helps to accentuate the facade of your structure and brings light to any color scheme.

Planters are decorative boxes made to be hung under a window. They can also be utilized to maximize ground space in a yard or terrace. We can customize our planters to fit perfectly in any window. They are manufactured in any solderable materials such as copper and stainless steel. You can choose from our selection of our standard styles or create your own. If you design a custom planter we can add it to our website and name it after you!

## Carol Planter

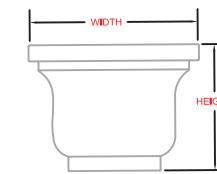

Shown in Evergreen Copper

Very meticulous and lustrous flower box that adds beauty to any home or office and is made to complement any flower arrangement.

## Evan Planter

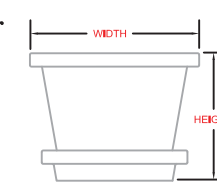

Shown in Copper

Classic Style that will appeal to both traditional or contemporary design.

## J Momma Planter

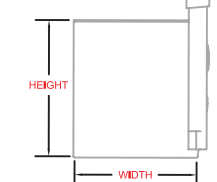

Shown in Freedom Gray

Medieval style, maintains an antique look with a polished and beautiful modern finish.

## Loic B Planter

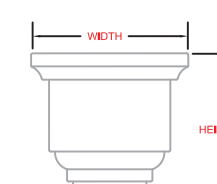

Shown in Lead Coated Copper

Conventional Flower Box, designed for a simple yet specific taste.

## Opa Planter

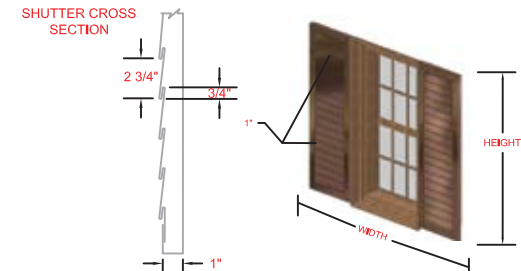

Shown in Copper

Enduring quality that never goes out of style, can blend in with any facade.

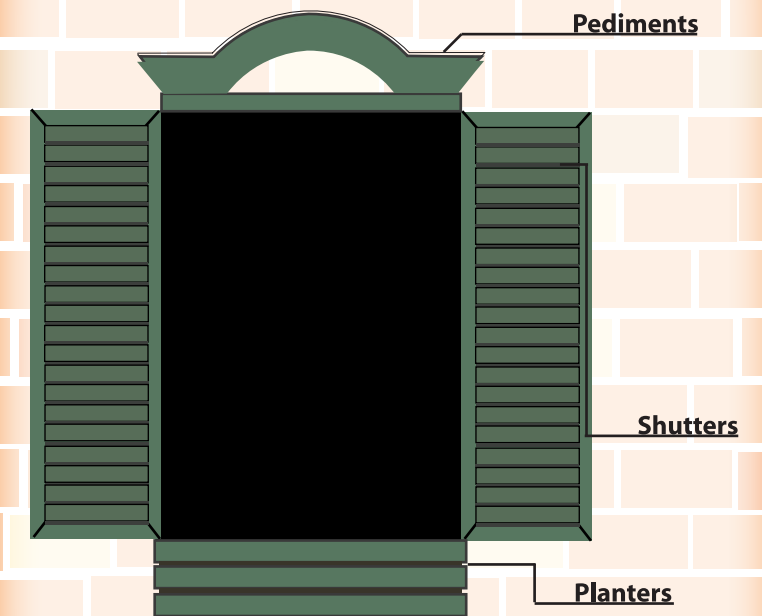

Shutters are window coverings in the form of two hinged panels located on each side of the window frame to diffuse light. They are often used for decorative purposes in modern construction and are also a great way to add architectural interest to any home or building.

## Copper Shutters

Shutters provide protection from solar nuisance and also increase the level of privacy in the home. Its primary function is to prevent inordinate amounts of light from entering a building or home. Comes in set of 2

\*Shown here in Evergreen Copper
